# THE IIT-FOUNDATION COURSE

THE BASICS OF  
**SUCCESS**

## THE IIT-FOUNDATION COURSE

Fast forward a few years when your child wants to be in the IITs or other such pre-eminent institutions to equip himself / herself for a career at a global level. S/he will write the most demanding of entrance examinations and compete with the country's best minds for that coveted seat.

When your child enters that examination hall, only conceptual clarity, intelligent application and practice will set him or her apart from the others. The homework for that must begin today.

Over the years, we've seen countless students face competitive examinations and the success rate has been the highest for those who began preparing early to strengthen their fundamentals. That is where **T.I.M.E.'s** IIT-Foundation course comes in.

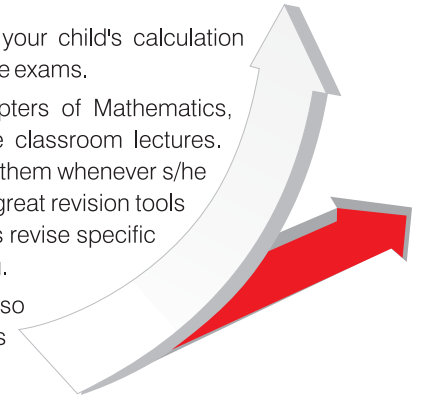

## THE CUTTING EDGE

Imparting all the important logical reasoning skills needed for a student is given due importance in the course. This will equip your child with skills in succeeding various competitive examinations in his/her near future. Further these skills may be useful in handling various situations in his/her life efficiently.

Speed Math classes will be provided to enhance your child's calculation speed which will be very useful for all future competitive exams.

Video lectures will be provided on important chapters of Mathematics, Physics and Chemistry. These will supplement the classroom lectures. These are very useful to a student as s/he can watch them whenever s/he wants in that academic year. Video lectures are also great revision tools prior to exams and assessments. They help students revise specific concepts of the chapters and reinforce understanding.

In addition to paper-based tests, Online Tests will also be provided to all classroom students. These tests give additional practice to a student in various topics.

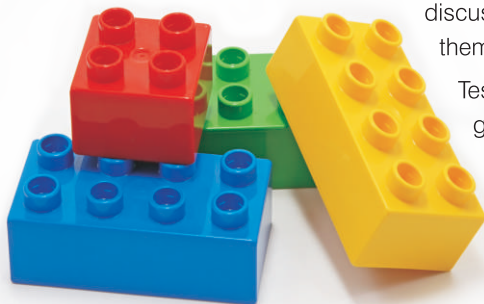

## BUILDING THE BASICS

The IIT-Foundation course is comprehensive, covering the basics of Mathematics, Physics and Chemistry and moving on to different levels of descriptive and objective questioning. The exercises in the study material are designed to test cognitive abilities at a variety of levels. The exercises which are known as Skill-Builder Exercises are designed to help develop knowledge, understanding, application and analytical Skills.

The exercises use an interactive question-and-answer approach of learning. These interactive sessions are equipped to do two things. They encourage children to ask questions which is a great way to deepen learning. They also improve communication skills, help in teaching the child to cope with discussions in a group and make the most of them.

Test papers are administered periodically to gauge the student's strengths and weaknesses. As parents, you are also provided feedback on the performance of your child in these tests.

Career guidance rounds off the course effectively.

## COURSE DETAILS

Our IIT-Foundation course is a one-year programme. Apart from classes during vacations, there will be classes for 6 - 8 hours per week, with a break during Mid-term exams.

The course is designed to suit the needs of students of 6<sup>th</sup>, 7<sup>th</sup>, 8<sup>th</sup>, 9<sup>th</sup> and 10<sup>th</sup> standards of CBSE, ICSE and State Boards.

Our IIT-Foundation course can also work wonders for students who wish to pursue their careers in fields other than engineering and medicine. Since the course builds basics like Reasoning and Math abilities, the lessons remain equally relevant to a budding accountant, artist or pilot.

More information on the course and how to register is available at any of our centres in your city.

Enrol your child at any of our offices across the city.
